

If your business is booming but you are tying up resources and capital managing your warehouse, perhaps it is time to outsource your warehousing needs to a third party that can help you scale to the next level.

A partnership with Orbit can help reallocate capital and give you more time to focus on your core business. Here is a checklist of information that will help us optimize your warehousing solution.

Warehouse Checklist

- Temperature / Humidity Requirements
 - Is your product temperature controlled (e.g., Ambient, Temperature Control)?
 - Do you need to monitor or control humidity?
- Product Security & Environmental Characteristics
 - Are any of your products high value that require additional security?
 - Are there any hazardous products in your product catalog?
 - Do you have lithium ion batteries as a stocked item, or as a component of a stocked item?
- Product Data Capture Requirements
 - When your product is in inventory, what key data elements do you need to be tracking?
 - Lot and Serial Number
 - Expiration Date
 - Country of Origin
- Storage Totals
 - What does your average on-hand inventory look like?
 - Average SKU's in-stock
 - Average Lot Codes per SKU
 - Average Inventory Value (replacement cost)
 - Estimated Annual Turns
 - % of Volume stored as Pallets, Cases, Eaches
- Inventory Management
 - Do you have any inventory management requirements?
 - Rotation requirements?
 - Cycle count requirements?
 - Annual physical inventory requirements?
